

Philad<sup>a</sup> 10 "mo" 1<sup>st</sup> "1848

My dear friend

a lot of pretty swiss baskets which  
fell in to my hands a few days since  
I have directed to be sent to you for the  
San. I wish I could <sup>have</sup> accompanied them  
with a lot of quinine samples, but I could not.  
They will sell better I think if "fixed up"  
with bright colored men of some kind.

Have you any news from your rulers  
& the party? We hear nothing altho  
so near to you. all that is in the papers  
we see of course, but that is generally not  
as interesting as private matters. I wish  
Pendell was getting better. we did not know  
of his sickness & this is only an illustration  
of how far from our position makes us.  
I wish you would see to it that all letters  
that are written to Sidney have in them a  
direction that they be sent to us after he has  
46 have read them. My advice is paid for the cause, take

Why you might all slide off into the soil & we  
not hear of it until too late to save you.  
Will you also tell us how Garrison is, & what  
your prospects are for the Fair & the Winter  
Campaign. We are in glorious spirits.  
Oliver Johnson is with us & Sam going to  
try <sup>share his activities</sup> ~~to~~ ~~be~~ as to labor in our field  
either as Assistant Editor, publishing agent  
or lecturer. Some think he ought to be  
in New York to aid Sidney, which is a  
good idea. What do you think of it.  
Our Ex Com<sup>tee</sup> have resolved to hold a Con-  
vention at the close of each week for the  
next 3 to 5 months. Two have come off &  
were quite encouraging. As you can see  
by the Freeman we have had some effective  
meetings in the City. The best was the  
last. CCB made the principal talk.  
But I have no time to write more  
you are no doubt tired of studying  
out what I have written, with love to all  
Remain as ever Eudais

I have no time to connect, did must go in the coach or not at all
